*We reserve the right to refuse service to any individual
Please be aware that occasionally you will come across fish with bones or oysters with
remains of a shell. We cannot promise that every filet will be boneless. Remember
that oysters are a shellfish; there are certain things that come from our distributors
that we cannot see. While preparing our barbecue we make every effort to remove all
bones but sometimes we miss some. However, if you come across these problems
please notify our management. Our goal is complete customer satisfaction.*
